Research Interest

Focused on understanding the interplay between **food rheology, structure, & nutrition** to enhance food processing, packaging, & functionality. Expertise includes **cereal & grain Science, gluten-free and Gluten product development, & food allergens**, with applications of **microscopy** for structural analysis. Passionate about integrating **AI in Food Science & Technology** to optimize processes & predict quality outcomes.

Educational Qualifications

- From July 2003 – June 2006: **Bachelor of Science (B.Sc., Biology & Chemistry)** from Chaudhary Charan Singh University, Meerut, UP
- From July 2007 – July 2009: **Master of Science (M.Sc., Food Science & Technology)** from Bundelkhand University, Jhansi
- From Oct 2017 – April 2022: **Doctor of Philosophy (Ph.D., Food Technology)** from Tomas Bata University in Zlin, Czech Republic

Thesis Title

- **Masters:** Evaluation of Rice Bran Filled Low-density polyethylene films for microwave heating of foods
- **Ph.D.:** Effect of enzyme on the Rheological Characteristics of the Gluten-free dough & bread

Visiting/ Exchange Studentship

- **Master of Science:** (February 2009–April 2009); Defense Food Research Laboratory, Mysore, a research laboratory of Defense Research & Development Organization
- **Doctor of Philosophy:** (April 2018–August 2018); University of Applied Sciences, Fulda, Germany (Food Processing & Characterization)

Work Experience

March 2025 – Continue: **Assistant Professor** at Ganpat University, Gujarat, India.

July 2022 – June 2023: **Postdoctoral Researcher** at University of Porto, Portugal.

March 2011–Oct 2016: **Production & Quality Executive** at Foods & Inns Ltd., Valsad, Gujarat, India

August 2009–February 2011: **Quality Assurance Officer** at GoldWin Agro Foods Pvt. Ltd., Goindwal Sahib, Punjab, India.

Certificate

Certified Trainer, Craft Baker (FIC/Q5002) - v4.0) By FICSI, Government of India, New Delhi

Industrial & Laboratory Training

October 2024 – October 2024, (3 weeks): **Devansh Testing & Research Laboratory, Roorkee, India (Handling equipment: HPLC, GC-MS/MS, LC-MS)**

June–July 2008 (01 month): **Hindustan Coca-Cola Beverages Pvt. Ltd., Dasana, Ghaziabad**

Skills and Techniques

Understanding of food chemistry (composition, interactions, and reactions), food microbiology (microorganisms and their control), food processing and engineering (techniques and principles), and nutrition (human needs and dietary guidelines).

Rheology and texture analysis assess physical characteristics like flow and texture. Chromatographic (HPLC, GC-MS/MS, LC-MS/MS) and spectroscopic (DSC, SEM, FTIR) methods analyse chemical composition, thermal behaviour, microstructure, and molecular interactions.

Handling Equipment

Rheometer, Texture meter, Mixolab, Fermentometer, Colorimeter, Differential Scanning Calorimetry (DSC), Scanning Electron Microscopy, Fourier Transform Infrared Spectroscopy (FTIR), Falling meter, HPLC, GC-MS/MS, LC-MS.

Attended International Scientific Conferences

- **Invited Speaker**; 12–15 December: 15th Hellenic Nutrition & Dietetics Congress, & 4th Hellenic Congress on Clinical Nutritional & Metabolism, Athens, Greece
- **Oral presentation**; 5–7 November: Second meeting of Young Researchers from V4 Countries, Nitra, Slovakia
- **Oral Presentation**; 16-17 May 2018: 12th International Scientific Conference, Nitra, Slovakia
